Abstract (Basic): JP 57032215 A

Powdered pharmacological compsn. administered to nasal mucous membrane, comprises cellulose lower alkyl ether in which the viscosity of 2 wt.% aq. soln. at 37 deg.C is 5 cps. or more, and a drug. More than 90 wt.% of the particles have an effective particle size of 20-250 microns.

Pref. the compsn. is in unit dosage form. Pref. cellulose lower alkyl ethers are methylcellulose, hydroxyethylcellulose, esp. hydroxypropylcellulose, etc. Drugs are steroid or non-steroid type antiinflammatory drugs, antihistamine or antiallergic drugs, antibiotics, vasodilators, vitamins, tranquillisers, etc. The ratio of cellulose lower alkyl ether to drug is dependant on the on the drug.

The powder adheres to nasal mucous membrane and forms liq. having adhesiveness and fluidity by absorbing water on the nose mucous membrane. The nasal mucous membrane is covered with the liq. and the drug is released for a long time, therefore high utilisation efficiency of the drug is obtd.

Title Terms: COMPOSITION; APPLY; NASAL; MEMBRANE; COMPRISE; CELLULOSE; LOWER; ALKYL; ETHER; ANTIINFLAMMATORY; ANTIHISTAMINE; ANTIALLERGIC; DRUG
Derwent Class: A96; B07
International Patent Class (Additional): A61K-009/14; A61K-047/00
